

## How to import Database connections into Oracle SQL Developer from XML

1. Right-click on Connection root, a small context menu appears

2. Click on "Import Connections"

3. In the "Import Connection Descriptors"

- a) browse the **C:\Users\Public\Desktop\connections.xml** file on the desktop (note: this is a hidden folder so you need to type 'Desktop' in the window)
- b) select connections to import (hold Ctrl to select multiple connections)
- c) click "OK"

4. Import completed.
